

MERCURY ENERTIA™

Enertia vs. Conventional Stainless Steel Propeller

23%

faster
from 0 - 30 mph

2 mph

top speed gain

Testing performed by Mercury Marine using standardized test procedures. Subject boat used was a 24-foot Mako center console powered by a 250 Mercury Verado. Enertia vs. a conventional stainless steel propeller of the same pitch.

X7^{ALLOY}

A revolutionary new alloy from Mercury that shatters the rules of propeller design.

- 30-percent stronger than conventional stainless steel
- Four times more durable than conventional stainless steel
- Allows prop designs that are impossible with conventional stainless steel
- Patent pending, so no other manufacturer has access to exclusive X7 formula

Mercury Enertia doesn't break the laws of physics – it rewrites them.

- Better acceleration and top speed
- Thin blades and higher rake angles for increased efficiency
- Perfect for high-horsepower outboard-powered offshore boats
- Stays hooked up; fewer blowouts while cornering
- Built with exclusive X7 Alloy for ultimate strength and durability

THE ULTIMATE OFFSHORE PROPELLER

MERCURY ENERTIA™

MERCURY PROPELLERS – already the world leader in prop technology – is proud to introduce Enertia, a revolutionary product that will measurably improve acceleration and top speed on many boats powered by high-horsepower outboards.

Mercury's world-class engineers have designed a prop that was once thought to be physically impossible because of the limits of conventional metals. The unbelievable strength of the X7 Alloy allowed us to forget the old rules of propeller design and give boaters exactly what they want from a prop – everything.

Enertia is available in standard rotation in one-inch pitch increments from 14 to 22 inches, plus four counter rotating pitches from 15 to 21 inches, to custom fit practically any outboard-powered deep-vee boat.

ENERTIA PART NUMBERS

Diameter X Pitch	RH Rotation	LH Rotation
15.2" x 14"	898988A46	
15" x 15"	898990A46	898991A46
14.82" x 16"	898992A46	
14.65" x 17"	898994A46	898995A46
14.5" x 18"	898996A46	
14.375" x 19"	898998A46	898999A46
14.25" x 20"	899000A46	
14.125" x 21"	899002A46	899003A46
14" x 22"	899202A46	

One-inch pitch increments for ultimate dial-in capability.
